

INDAZOLE COMPOUNDS, COMPOSITIONS THEREOF AND
METHODS OF TREATMENT THEREWITH

ABSTRACT OF THE DISCLOSURE

5 This invention is generally directed to the use of Indazole Compounds for
treating or preventing diseases associated with protein kinases, including tyrosine kinases,
such as proliferative diseases, inflammatory diseases, abnormal angiogenesis and diseases
related thereto, atherosclerosis, macular degeneration, diabetes, obesity, pain and others.
The methods comprise the administration to a patient in need thereof of an effective amount
10 of an indazole compound that inhibits, modulates or regulates tyrosine kinase signal
transduction. Novel indazole compounds or pharmaceutically acceptable salt thereof are
presented herein.
